No Impacts

Minimal Impacts

Moderate Impacts

Severe Impacts

WEATHER KEY POINTS

03/30/22 - 04/05/22

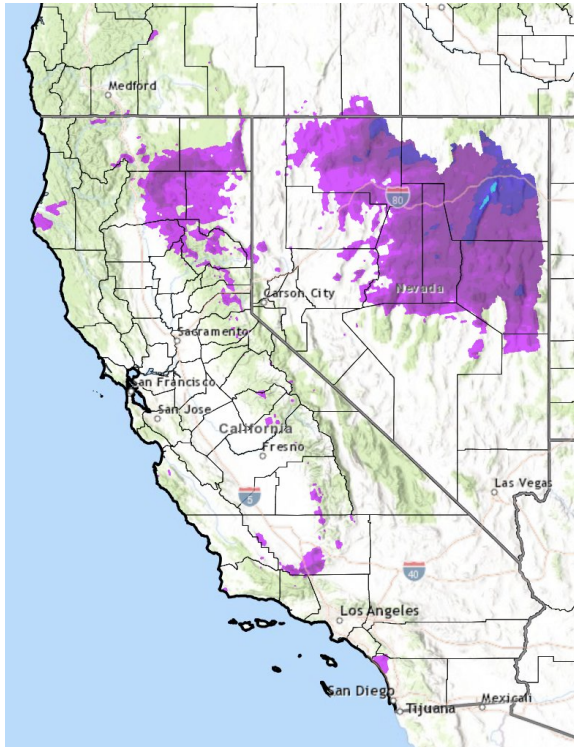

Wednesday - Tuesday

- No widespread significant weather concerns are expected over the next 7 days, with just some light showers possible across northern California, the Sierra, and coastal southern California later in the weekend and early next week
- Temperatures will see a notable warming trend across the Central Valley and inland southern California through late week and the weekend, with daytime readings in the 80s to lower 90s, hottest over the southern deserts
 - Some minor heat risk impacts are possible during the afternoon hours, though cooler overnight temperatures will mitigate a higher risk
- Gusty north to east winds are expected across the northern Sacramento Valley on Thursday, but with recent rainfall, no significant fire weather concerns are expected

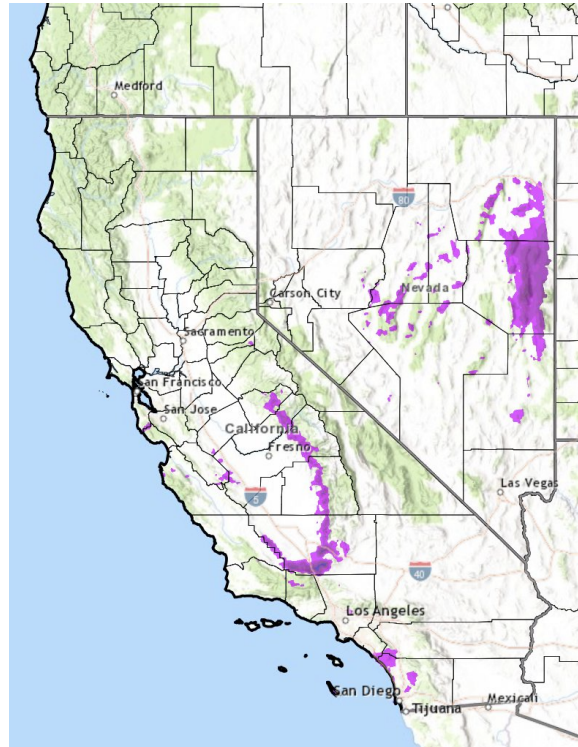

PRECIPITATION FORECAST

03/30/22 - 04/01/22

Wednesday

Thursday

Friday

Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms may produce locally higher rainfall amounts.

Precipitation (inches)

WEATHER OUTLOOK

04/04/22 - 04/12/22

6-10 Day Outlook (April 4 - April 8)

Temperatures

- Above normal temperatures are strongly favored statewide

Precipitation

- Below normal precipitation is strongly favored for most areas, except far southern California where near normal precipitation is favored

8-14 Day Outlook (April 6 – April 12)

Temperatures

- Above normal temperatures are strongly favored to persist for most areas

Precipitation

- Below normal precipitation is favored across northern and central California, with near normal precipitation favored in far southern California
